Thirty-Second Annual Report on

EMPLOYMENT SECURITY IN MONTANA

For The Fiscal Year Ended June 30, 1968

UNEMPLOYMENT COMPENSATION COMMISSION

UCC Building — Box 1728 — Helena, Montana
Edgar H. Reeder, Chairman and Executive Director

TIM BABCOCK

Governor

THIRTY-SECOND ANNUAL REPORT

To The Governor of Montana

The Honorable

TIM BABCOCK

ON

Employment Security In Montana

FOR THE FISCAL YEAR ENDING JUNE 30, 1968

UNEMPLOYMENT COMPENSATION
COMMISSION OF MONTANA

**UNEMPLOYMENT
COMPENSATION COMMISSION
OF MONTANA**

HELENA, MONTANA

January 1, 1969

Honorable Tim Babcock
Governor of Montana
Helena, Montana

Dear Governor Babcock:

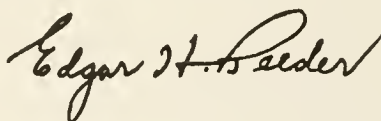

This, the thirty-second in a series of annual reports on employment security in Montana, is submitted in accordance with the requirements of Sections 87-120 and 87-122, Revised Codes of Montana, as amended.

The work and activities of this Commission are concerned with people and their livelihoods, with industry and agriculture, and with the economic well being of the entire state. The daily routine of our work perhaps touches the lives of more people than any other single arm of government.

Despite the disturbing element of the strike in the copper industry for 8½ months of the period covered by this report, we are pleased to report that employment in other industry groups held at high levels. In fact, industrial employment, on a monthly basis for the fiscal year ended June 30, 1968, established new job records for ten of the twelve months of that year. This accomplishment, in the face of the copper strike, is indeed an outstanding achievement for the Montana economy.

We look forward to more industrial and job growth in the years to come, and stand ready for whatever work there is to be done.

Respectfully submitted,

A handwritten signature in dark ink, reading "Edgar H. Reeder". The signature is written in a cursive style with a large, stylized 'E' and a long, sweeping underline.

DECLARATION OF STATE PUBLIC POLICY

The following statement of policy constitutes the introductory paragraph of the Montana Unemployment Compensation Law.

87-102. As a guide to the interpretation and application of this act, the public policy of this state is declared to be as follows: Economic insecurity due to unemployment is a serious menace to the health, morals, and welfare of the people of this state. Involuntary unemployment is therefore a subject of general interest and concern which requires appropriate action by the legislature to prevent its spread and to lighten its burden which now so often falls with crushing force upon the unemployed worker and his family. The achievement of social security requires protection against this greatest hazard of our economic life. This can be provided by encouraging employers to provide more stable employment and by the systematic accumulation of funds during periods of employment to provide benefits for periods of unemployment, thus maintaining purchasing power and limiting the serious social consequences of poor relief assistance. The legislature, therefore, declares that in its considered judgment the public good and the general welfare of the citizens of this state require the enactment of this measure under the police powers of the state for the compulsory setting aside of unemployment reserves to be used for the benefit of persons unemployed through no fault of their own.

EMPLOYMENT SECURITY ACTIVITIES AIM AT FULL DEVELOPMENT OF HUMAN RESOURCES

The Montana Unemployment Compensation Commission and the Montana State Employment Service comprise the federal-state employment security system. For the past thirty-one years, this Montana agency has provided employment and related manpower services for Montana workers and employers, and unemployment insurance services for eligible, unemployed workers.

The 24 local offices of the Montana State Employment Service, located strategically throughout the state to provide maximum service, have made a total of 1,328,793 individual job placements in industry and agriculture for Montana workers since the commission was created by legislative action in March, 1937.

The first unemployment check in Montana was written on July 22, 1939. Since then, and through the last fiscal year ended June 30, 1968, a total of \$131.5 million has been paid in unemployment insurance benefits to eligible Montana unemployed workers. Montana employers insured under the Montana Unemployment Compensation Law have paid a total of \$133.7 million in employer contributions to the UCC Trust Fund since the program started and through June 30, 1968. This employer contribution is used only for the payment of unemployment insurance benefits. Over the years, interest on the fund has earned \$18.6 million. The Montana Unemployment Compensation Commission Trust Fund balance stood at \$21,388,855 when the fiscal year ended on June 30, 1968.

Administrative costs for operation of all employment security programs in Montana and the other 49 states come from congressional appropriation.

The work of the Montana Unemployment Compensation Commission is concerned with the totality of manpower. The Montana State Employment Service and its network of 24 local Montana employment offices is the job finding arm of the commission. These offices provide related manpower services including referral and placement of workers, employment counseling, occupational testing, labor market analysis and information, and special applicant services. These offices now make 70,000 job placements yearly in industry and agriculture, within the state of Montana.

Through the years, the employment service has constantly expanded and redirected its program to reflect changing economic conditions and to adopt manpower utilization functions to the need of the times.

A substantial amount of federal legislation in the past 7 years has been geared to the full utilization of manpower. Among the first was the Manpower Development and Training Act of 1962. The Montana State Employment Service has been involved in this program since its inception and the results have been highly successful. A total of 172 training projects covering 94 different occupations have provided more than 3,600 Montana workers with new skills, or sharpened and upgraded their chances to find a better job. Ninety per cent of the trainees have been placed in training related jobs when courses were completed.

The Concentrated Employment Program (CEP) is the latest addition to the roster of manpower programs. The \$2 million program is now getting underway in a six Montana county area: Broadwater, Deer Lodge, Jefferson, Lewis and Clark, Meagher, and Silver Bow. The Butte-Silver Bow Anti-Poverty Council is the sponsor.

The (CEP) program seeks to bring together in one united effort the various manpower programs. The sponsor will seek out the hard core unemployed and make available to them such services as orientation, basic education, counseling, medical treatment, day care, transportation, job development and placement, as well as work experience and training. Training opportunities will be provided for more than 1,545 hard core Montana unemployed.

Another, the Work Incentive Program (WIN) has as its objective to move men, women, and out-of-school youths 16 or older off the welfare rolls and into productive employment. It is specifically directed at welfare recipients of aid to families with dependent children (AFDC). The program's intention is to meet the enrollee at his level of experience and motivation and enable him to move through an experience of work, training, and education into a job that gives him a chance to use his potential.

The initial (WIN) project in Montana involves five counties: Silver Bow, Yellowstone, Glacier, Missoula, and Cascade where fifty per cent of the (AFDC) case load is located. An initial enrollment of 400 persons is expected.

A basic plan for implementation of the (WIN) program in Montana is completed.

All of the manpower programs and services are concerned with the fullest development of our human resources. Much of the direct return from these measures will accrue to the unemployed and the disadvantaged in the form of increased incomes

and the satisfaction of the dignity of work. They are the positive approaches to solving our manpower problems. Indirectly, the whole human family will benefit through greater economic growth and reduced social tensions.

Chairman and Executive Director Edgar H. Reeder heads up the three member Montana Unemployment Compensation Commission on a full time basis. Members who serve on a per diem basis

as commission business warrants are James J. Flaherty, Great Falls, and Fredric D. Moulton, Billings.

At present there are 304 commission personnel at the state and local offices working to serve all of the people of Montana.

Jess C. Fletcher is state director of employment service operations. Administration of unemployment insurance activities is under the direction of Donald Merritt.

SEVEN YEAR JOB GROWTH IN SIX MAJOR INDUSTRIES

Paced by job gains in six of the eight basic Montana industry groups, non-agricultural employment in Montana was 23,100 higher at the end of 1967 than in 1960.

The average yearly non-agricultural job total for 1967 was 189,900 for the highest yearly average ever recorded in Montana. The 1960 non-agricultural job average was 166,800.

Considering the fact that the copper industry strike was in effect for 5½ months of 1967, the record yearly job total for 1967 is indeed an outstanding achievement for the Montana economy. It speaks well for the basic strength and growth of other industry groups during the copper strike period.

Over the past seven years (1960-1967) employment in the service industries increased by 5,500 workers. Employment in trade establishments was up by 4,200 from 1960 through 1967. Growth in man-

ufacturing over the seven-year period is reflected in a 2,100 worker gain. More moderate job gains of 600 in construction and 400 in finance, insurance and real estate firms completes the industrial job growth cycle for the seven-year period. Employment in government was up by 13,300 from the 1960 through 1967.

Two industries, mining and the transportation and utilities group, did not share in job gains the past seven years. Mining, beset by labor troubles which forced employer economies and production changes, had 1,800 fewer workers at the end of 1967 than in 1960. The bulk of the 1,200 worker decline during the past seven years in the transportation and utilities group, was in railroad employment. The Montana situation in this respect ties in closely with national trends of cutbacks in railroad passenger service and other related railroad activities.

UNEMPLOYMENT INSURANCE BENEFITS THE WHOLE ECONOMY

Thirty years ago the principle of insurance was applied in Montana to the problem of unemployment—the loss of jobs.

From that time forward and until the present day, Montana has grown both economically and industrially.

Yet the strongest economy undergoes constant change . . . there are times when periods of readjustment bring about periods of unemployment. And in Montana, the pressure of seasonal forces causes some unemployment in outdoor industries during the winter months.

The duration of unemployment for many is brief; for others it may stretch from a few weeks into months.

But, every instance of unemployment, no matter to whom it happens or no matter how long it lasts, means a loss of wages.

The first unemployment insurance check in Montana was written on July 22, 1939. From that time, and through the last fiscal year ended June 30, 1968, a total of \$131.5 million has been paid in unemployment insurance benefits to eligible Montana unemployed workers.

An audit of cancelled Montana unemployment insurance checks reveals that more than 85 per cent are spent for food, shelter, clothing, and medical bills.

These high velocity dollars moved through grocery stores and retail trade establishments to distributors, to wholesalers, and to manufacturers. At each point, some branched off laterally into other trade and service firms, some went into payrolls. Again and again, these moneys turned over quickly. They helped keep other businesses operating and stabilized employment.

So, unemployment insurance money is buying power. It gets back into circulation without delay because it is used to pay for immediate needs. The unemployment insurance dollar is one of the hardest working dollars in the community. Continued buying power among the unemployed keeps up the

demand for goods and services and helps keep the Montana economy on an even keel.

The goal of unemployment insurance is humanitarian in concept, but it is based on a hard set of realities.

Realities like the amount of premiums paid each year by Montana employers through a tax on their payrolls; like the amount of money paid out each year to be eligible unemployed Montana workers.

There are other realities . . . like the creation of a reserve fund for those years when more money is paid out than is received . . . like the need to build up a substantial reserve so that benefits can be increased to meet the cost of living, or so that employers who pay the bill can have a reduction in the tax rate on their payrolls.

Montana employers insured under the Montana Unemployment Compensation Law have paid a total of \$133.7 million in employer contributions to the UCC Trust Fund since the program started and through June 30, 1968. These employer contributions are used only for the payment of unemployment insurance benefits to eligible, unemployed Montana workers. Over the years, interest on the fund has earned a total of \$18.6 million through June 30, 1968.

Unemployment insurance is in reality community insurance. Through the payment of its benefits, purchasing power is maintained in a community when workers are laid off. This money helps to stabilize the economy and keep other workers on the job.

Unemployment insurance benefits help to keep skilled workers close at hand by enabling them to weather the layoff period until called back to work. This can represent a considerable saving to employers by preventing costly turnover and retraining of workers, and in maintaining production schedules.

These factors of income maintenance, economic stabilization, and reduced labor turnover become more important as our economy becomes more complex. They benefit both the community and the employer.

IT'S TIME FOR A NAME CHANGE

The Montana Unemployment Compensation Commission would like to have a new name.

When the Montana Unemployment Compensation Commission was created by legislative action in March, 1937, Montana and the rest of the country were at the tag end of the depression years of the early 1930's.

In line with the times, local offices of the Montana State Employment Service were mainly the place to sign up for unemployment insurance benefits. But those times have changed.

Simple logic now supports the riddance of a name with negative connotations and substituting one that emphasizes the more positive aspects of the employment security programs and operations in Montana.

1. Montana is now the only one of the fifty states in the nation which operates its employment security program under the "Unemployment Compensation Commission" name.

2. "Employment Security Commission of Montana" would be a more appropriate and descriptive name encompassing both the employment service and unemployment insurance activities of the commission.

3. The desire for a name change is not a psychological attempt to distract attention from the sub-

stantial sums of money paid yearly in unemployment insurance benefits to eligible, unemployed workers. Unemployment insurance is an important part of the employment security program. It helps workers maintain some level of economic stability during layoff periods.

4. Over the years as the Montana economy has advanced and grown, employment security emphasis has shifted more and more to services and programs aimed at the full utilization of manpower resources. These include job development, referral and placement of workers, job analysis, occupational testing, employment counseling and selective placement, industrial services, community participation, and labor market information. In the past seven years a substantial amount of federal legislation has created new manpower and training programs involving the Montana State Employment Service. The employment service aspects of this commission's work and the new manpower programs are of prime importance in helping to maintain a healthy economic picture in Montana.

5. It is hoped that the next legislature will look favorably upon the request of the Montana Unemployment Compensation Commission to change the name of the agency to reflect and accentuate the positive aspects of its many employment security programs which benefit all of the people of Montana.
